**To Whom It May Concern**

Audenshaw School has had a long standing professional relationship with HH Smith over a period of 15 years. The company is the named contractor for all design and build work at the school.

HH Smiths have been the contractor for over £4 million worth of building development at the school. Their professional and technical competence is excellent. They have provided first rate advice on project design.

Their site organisation, resources and supervision have been excellent with great consideration given to the logistics of building work being carried out at a busy secondary school.

Where sub contractors have been used, careful monitoring by Smiths has ensured quality has been assured.

Their standard of compliance with Health and Safety is excellent with an experienced and competent Health and Safety Officer managed external Health and Safety Services. Their degree of co-operation in contract monitoring, the quality of their workmanship and the standard of administration are all first rate.

They have met completion date targets and on the limited occasions when defects have been apparent they have dealt with complaints promptly and rectified any problems.

I would recommend H H Smith's without reservation.

Yours sincerely,

*SJ Turner*
